

Muse Site Walkthrough

Every page of muse.sa in both languages, on desktop and mobile: the screens, the copy, the register. Screenshots come from the staging build of 2026-08-04, taken at 1440px and 390px. Copy is quoted verbatim from the site's own content files.

Working walkthrough. Shows the site as shipped on staging/bilingual-ar-en, after the de-AI copy pass. The Arabic is the site's own native copy, not a translation of the English.

01 How to read this

Ten routes, each shown the same way: the first desktop screen, the last desktop screen, and the full mobile page, in both English and Arabic. Key copy is quoted next to each screenshot so the words stay readable at print scale.

ROUTE	WHAT IT IS FOR
/	The landing: thesis, what we do, who for, why now, objections, one ask
/explore	The full version of the three approach cards, so a buyer can pick one door or combine
/services/*	Three deep pages, one per service. Same arc each time: hero, why, what we do, FAQ
/about	Who we are and why now, without inflation or fake proof
/careers	Roles plus a human fallback for candidates
/contact	The fastest path to a human. No sales layer
/get-started	Structured intake for a scoped project
/newsletter	Subscribe to the field notes
/privacy, /terms	Legal boilerplate, 5 to 6 sections each. Summarised on the last page

■ Screenshot legend

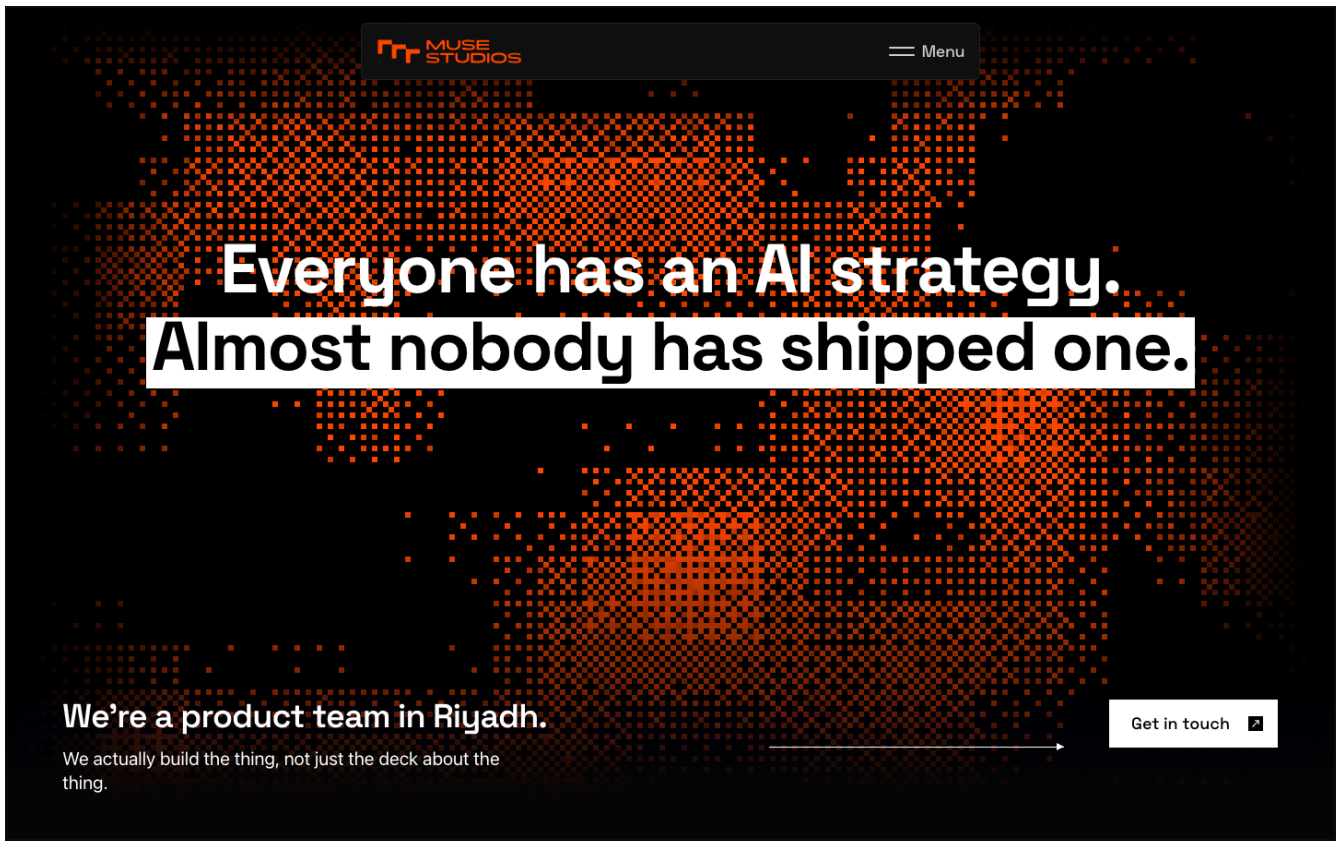

- **Desktop top:** first screen at 1440px, the hero and what opens the page.
- **Desktop bottom:** the last screen at 1440px, final CTA and footer.
- **Mobile top:** the first screen at 390px. The full mobile page runs tens of screens tall, so the hero screen stands in for it; the quoted copy covers the rest.

TWO LANGUAGES, ONE SITE

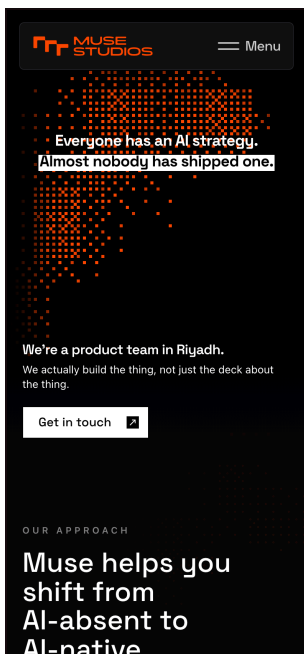

Both locales carry the same keys and the same structure; nothing is missing in one and present in the other. The English and Arabic are written independently, so sentences, lengths and register differ on purpose. 404 and the legal pages are single-page boilerplate and are covered on the last page.

02 The landing · English

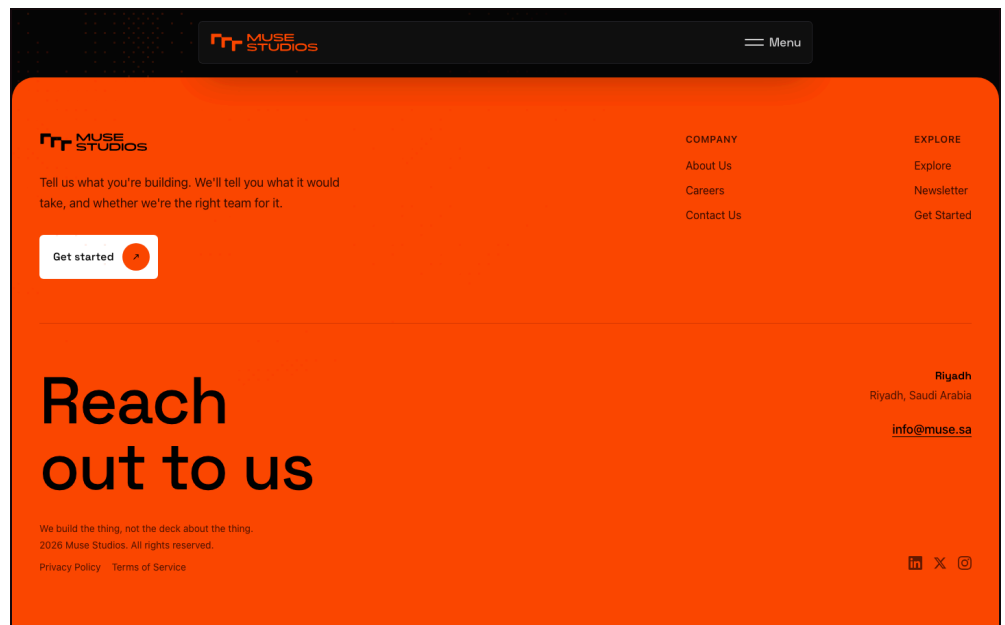

One page, one job: turn a stranger into a lead. Hero to final ask in eight sections.

Desktop top. Hero: "Everyone has an AI strategy." / "Almost nobody has shipped one." CTA "Get in touch".

Mobile, hero screen. Same sections, single column.

Desktop bottom. Final CTA "Tell us what you're trying to build." and the footer.

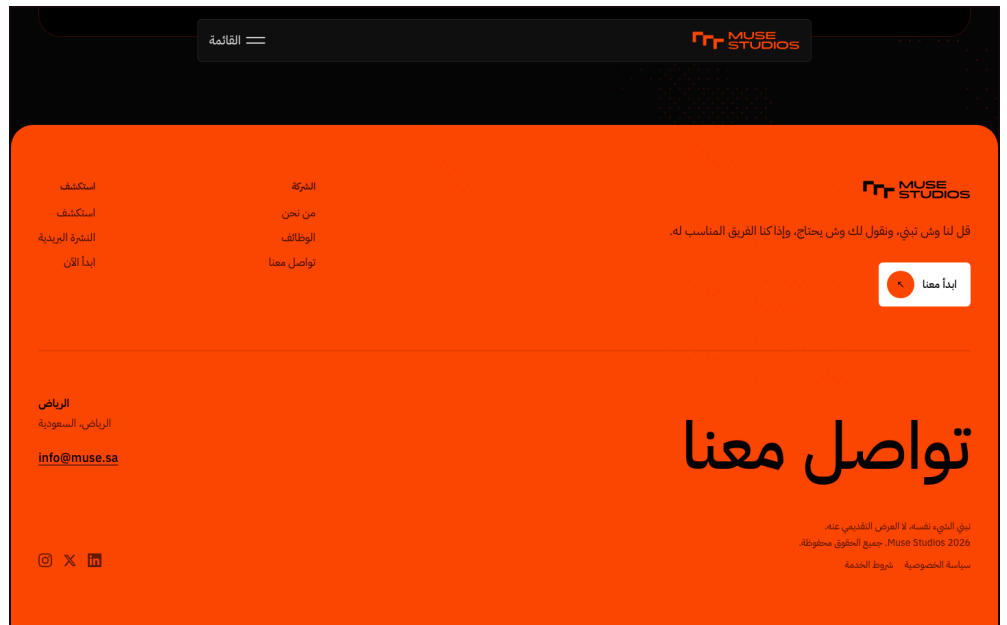

نفس الصفحة بالعربية: فكرة واحدة، من المقدمة إلى الطلب الأخير، بثمانية أقسام

”الشاشة الأولى. المقدمة: ”الكل عنده استراتيجية للذكاء الاصطناعي.“ / ”بس قليل جدًا اللي قدر ينفذها.“ زر ”تواصل معنا

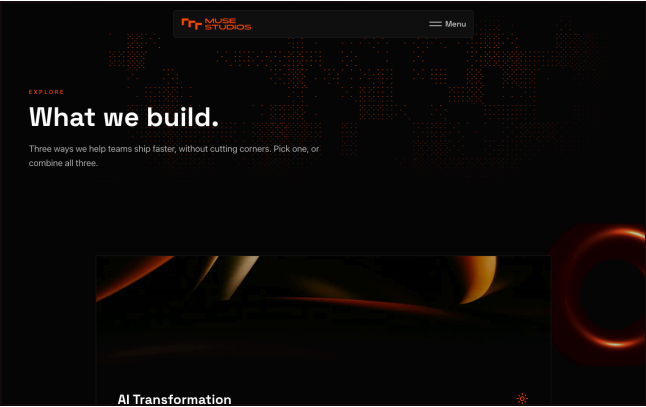

الجوال، أول شاشة، نفس الأقسام بعمود واحد، والاتجاه من اليمين لليسار

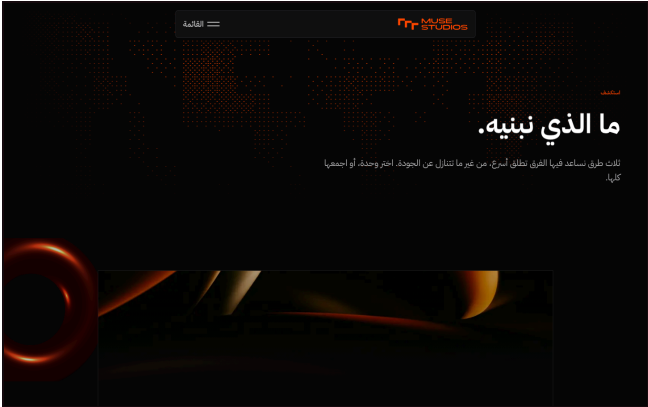

آخر الشاشة. الدعوة الأخيرة ”قل لنا وش تبني.“ والتذييل

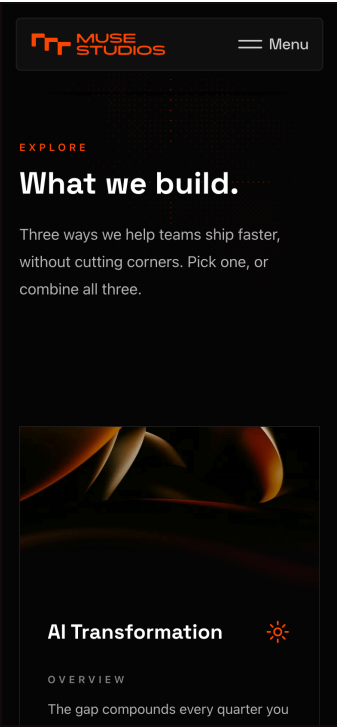

The three doors in full. Each card carries a summary and its own verb CTA, a pattern borrowed from tenex.

NOTES

The Arabic is written natively, not translated: same meaning, its own sentences, 1 to 2 spoken markers per paragraph. 40 Arabic strings remain flagged for a native reviewer before the Arabic route goes fully live.
