

Muse Site Walkthrough Direction 3: The Proof

A work-led homepage direction for muse.sa. The site opens with what Muse has built, not what Muse believes: anonymized case studies, live ventures, and content, in a proof wall before any argument. Screenshots come from the direction build of 2026-08-05, taken at 1440px and 390px. Copy is quoted verbatim from the site's own content files.

One of three homepage directions, each built and deployed separately. This walkthrough shows the Proof direction in both languages, section by section, and ends with the decisions the team needs to make.

DATE	PREPARED BY	REFERENCE	STATUS
2026-08-05	Abdullah Alsubaie	MUSE-DIR-03	Draft

01 How to read this

The Proof direction shows work before it says anything. A visitor meets the proof wall in the first screen after the hero, with nothing claimed that cannot be shown. Eight sections, top to bottom.

Homepage, top to bottom

SECTION	WHAT IT DOES
Hero	"We don't pitch. We ship." The tagline promises proof is below.
Proof wall	Six cards: anonymized case studies, live ventures, content. Each with real detail, not vague claims.
Three doors	Build, Ventures, Think. The ways the work happens.
Manifesto	Why now: the next two years decide the decade.
Outcomes band	Engagements end with outcomes, not tools.
Ticker	Nothing ships that we would not use ourselves.
FAQ	Five real objections, answered plainly.
Final CTA	"Tell us what you're trying to build."

Screenshot legend

- **Desktop top / bottom:** first and last screens at 1440px.
- **Mobile top:** the first screen at 390px.
- **Proof wall:** the centerpiece section, scrolled into view.

HONEST PROOF ONLY

Every card in the proof wall is one of two things: an anonymized case study of real shipped work, or a live venture with a real URL. There are no fake testimonials and no invented client logos anywhere on the page.

02 The landing · English

The hero states the position in two lines: "We don't pitch. We ship." The tagline promises what follows: "Everything below is real work." No thesis, no manifesto, no mission. Proof first.

Desktop top. Hero: "We don't pitch." / "We ship." Subtitle "Anonymized case studies. Live experiments. Content we wrote." CTA "View the work".

Mobile, hero screen. Same sections, single column.

Desktop bottom. Final CTA "Tell us what you're trying to build." and the footer.

03 العربية · The landing

نفس المقدمة بالعربية: "ما نبيع كلام، نبني ونطلق." والسطر اللي بعدها: "كل اللي تحت شغل حقيقي." الكلام مكتوب أصليًا بالعربية

"الشاشة الأولى. المقدمة: "ما نبيع كلام، نبني ونطلق." وتحتها "كل اللي تحت شغل حقيقي. دراسات حالة مجهولة الهوية. تجارب حية. محتوى كتبناه

الجوال، أول شاشة. نفس الأقسام بعمود واحد، والاتجاه من اليمين لليسار

آخر الشاشة. الدعوة الأخيرة "قل لنا وش تبي." والتذييل

KNOWN GAP: PROOF WALL IN ARABIC

The hero, doors, and closing sections are fully translated. The proof wall cards currently fall back to English while the native Arabic writer reviews the case study summaries, per the bilingual plan (English first, Arabic phase 2).

04 The proof wall · English

The centerpiece. Six cards in a 3x2 grid, each one an honest claim: a category tag, a title, one concrete detail, and a destination. The pattern is borrowed from Stripe’s case study wall: proof organized as stories, not adjectives.

The proof wall, English. Eyebrow “The work speaks”, heading “What we’ve shipped. What we’re building.” Subtitle “No decks. No strategies. Just work that’s running in production or live in the wild.”

CARD	CATEGORY	PROOF ON THE CARD
Core banking platform	Enterprise	”Replaced a 15-year legacy system for a PIF-level financial institution. 40+ services, zero-downtime migration, 200k daily transactions.” → /case-studies/core-banking
Automated underwriting engine	AI Feature	”Cut loan decision time from 3 days to 12 minutes for a Saudi fintech. 94% accuracy vs human baseline. Shipped in 8 weeks.” → /case-studies/underwriting
Consumer app redesign	Brand Interface	”End-to-end redesign for a 500k-user Saudi super-app. Design system, motion language, RTL-first. 40% retention lift post-launch.” → /case-studies/super-app
Muse Experiments	Venture	”Live lab for AI-native product patterns. 3D agents, generative interfaces, local-first sync. Open source, production-grade.” → experiments.muse.sa
Tenet	Venture	”AI-native knowledge base for teams that build. Not a wiki, a thinking partner. Early access live.” → tenet.muse.sa
Field Notes Newsletter	Content	”Weekly dispatches on what we’re seeing across engagements. No AI news. No 10-tip lists. Just field notes.” → /newsletter

05 Why the proof wall works

The research on work-led companies (Stripe, Vercel, Linear, Framer) produced five mechanics, and each one is present in this wall.

MECHANIC	SOURCE	HOW IT APPEARS HERE
Proof as stories, not adjectives	Stripe	Every card carries one concrete number or fact: 200k transactions, 12 minutes, 94% accuracy, 500k users.
Never a metric without a name	Stripe	Each metric is tied to a named, visitable destination: a case study page or a live URL.
Live, playable work	Framer	Muse Experiments and Tenet are live links, not screenshots. A visitor can click through and use the work.
Recently shipped	Vercel	The wall mixes shipped client work with in-progress ventures, so the site grows as the work grows.
Engagement, not testimonials	Linear	No quotes, no stars, no "trusted by". The work and its results carry the credibility.

The "portfolio as we go" problem

Muse is still early; a full case study library does not exist yet. The wall answers this honestly: three anonymized case studies of real shipped work, two live ventures with real URLs, one content line. As new work ships, new cards are added. Nothing on the wall is fabricated, and nothing is a placeholder for work that does not exist.

WHAT THE WALL DELIBERATELY AVOIDS

Fake testimonials. Vague claims ("we transform businesses"). Consultant vocabulary ("synergy", "digital transformation"). Stock team photos. "Learn more" links that go nowhere. Every card has a real destination or it does not ship.

06 Below the fold

After the proof comes the offer. The doors, manifesto, and closing are the same blocks as the other directions; only the order changes, proof before argument.

BLOCK	ENGLISH	العربية
Doors heading	"Three ways we work" / "Pick the door that matches you"	"ثلاث طرق نشغل بها" / "اختر الباب اللي يناسبك"
Doors	Build: "Production-grade software". Ventures: "Our own products". Think: "Knowledge & community".	بناء: "برامج جاهزة للإنتاج". مشاريعنا: "منتجاتنا الخاصة". فكر: "معرفة ومجتمع".
Manifesto	"The next decade of software gets decided in the next two years."	"عصر المنتجات الرقمية يتحدد خلال السنتين الجاية."
Outcomes band	"We deliver outcomes, not just tools."	"نوصل نتيجة فعلية، مو مجرد أدوات."
Ticker	"Nothing ships that we wouldn't use ourselves"	"لا نطلق ما لا نستخدمه نحن"
Final CTA	"Tell us what you're trying to build."	"قل لنا وش تبني."

English, last screen. FAQ, final CTA and footer.

العربية، آخر شاشة، الأسئلة، الدعوة الأخيرة، والتذييل.

07 Structure and sourcing

The order of the page follows the research findings from a study of work-led companies, adapted to Muse's reality. The recommended section order was: hero with proof promise, proof wall, live experiments, how we build, community, credibility anchors, CTA. Muse adapts it: the proof wall carries the experiments inside it, and community is deferred until there is a community.

PATTERN	SOURCE	HOW IT IS ADAPTED
Hero promises proof	Vercel	"Everything below is real work." makes the proof the contract of the page.
Proof wall	Stripe	Category tag, title, one concrete fact, destination. Stories, not adjectives.
Live experiments grid	Framer	Muse Experiments and Tenet are live links, playable by any visitor.
Build-in-public positioning	Linear	The wall mixes shipped work with in-progress ventures, and updates as work ships.
No fake testimonials	All sources	Zero quote walls. Zero "trusted by" rows. The metrics and URLs carry the page.
Three-door cards	tenex.co, salla.com	Build, Ventures, Think, positioned after the proof.
FAQ trust block	tenex.co	Five real objections answered on the page, in both languages.

RESEARCH BASIS

This direction was informed by a structured study of how Stripe, Vercel, Linear, and Framer showcase real work, including their section orders, metric usage, and anti-patterns. The full research notes are in the project vault.

08 Open decisions

Six decisions remain. Each carries a recommendation; a different answer from the team changes the plan.

1. Which case studies are real?

Three anonymized cards exist: core banking, underwriting, super-app redesign. They describe real engagements from the founding experience, anonymized by requirement. The team must confirm each card is a true account of shipped work before launch. A fabricated card would kill the direction's credibility.

2. Live URLs for the ventures

The wall links to [experiments.muse.sa](#) and [tenet.muse.sa](#). Those domains and products must be live (or staged with real content) before the site launches. A "View live" link that 404s is worse than no link.

3. Arabic proof wall

The hero, doors, and closing are fully translated, but the proof wall cards fall back to English until the native Arabic writer reviews the summaries. Recommendation: ship English-first per the bilingual plan, translate in phase 2.

4. Metrics that invite scrutiny

"200k daily transactions", "94% accuracy", "40% retention lift": each is a claim a buyer will test. The case study pages must carry the evidence for each number, or the number should be softened. Recommendation: keep the numbers, build the evidence pages.

5. Proof wall placement

The wall sits immediately after the hero, before the doors. This is the direction's whole point: work first. If the team finds the wall too aggressive before the pitch, it can move below the doors without changing any copy.

6. Field Notes as a proof card

The newsletter is content, not shipped work. It earns a place as the third category because it shows the work in progress, the same way Linear's changelog does. Recommendation: keep it, but make sure the newsletter actually ships weekly before launch.

09 The three directions, side by side

All three directions share the same visual design, the same doors, the same closing blocks, and the same honest-proof rule. They differ only in what the visitor meets first.

	DIRECTION 1: THE STUDIO	DIRECTION 2: THE THESIS	DIRECTION 3: THE PROOF
First move	The three doors	The argument	The work
Hero	"Everyone has an AI strategy. Almost nobody has shipped one."	Same as Direction 1	"We don't pitch. We ship."
New section	ThreeDoors first	TheProblem + TheStandard	ProofWall
Who it suits	Buyers who know what they need	Buyers who need to be convinced	Buyers who want to verify
Risk	Looks like every studio site	Tone may be too sharp	Requires the work to be real
Best test	Fastest to a pitch	Strongest differentiation	Strongest proof for skeptics

What the team decides next

- Pick one direction, or a blend: doors from 1, problem from 2, proof from 3.
- Confirm the three anonymized case studies are true accounts of shipped work.
- Confirm the venture URLs are live before launch.
- Run the Arabic phase 2 pass with the native writer, especially the proof wall.
- Merge the chosen direction to staging, review, then promote to main via MR.

The full copy for every direction lives in the site's content files, so any blend can be assembled without rebuilding the site.
