

Muse Site Walkthrough Direction 1: The Studio

A portfolio-first homepage direction for muse.sa. The site leads with what Muse does, organized as three doors: Build, Ventures, Think. Screenshots come from the direction build of 2026-08-05, taken at 1440px and 390px. Copy is quoted verbatim from the site's own content files.

One of three homepage directions, each built and deployed separately. This walkthrough shows the Studio direction in both languages, section by section, and ends with the decisions the team needs to make. Revision 2: doors rebuilt without eyebrows, Tenex hero line replaced, punctuation swept.

01 How to read this

The Studio direction puts the work first: a visitor arrives, sees what Muse does, and picks the door that matches them. One page, one job, from hero to final ask in eight sections.

Homepage, top to bottom

SECTION	WHAT IT DOES
Hero	The thesis in two lines, the tagline, one CTA. "We build our own software. And yours, properly."
Three doors	Build, Ventures, Think. Three cards, each with a promise and its own CTA.
Manifesto	The why-now argument: the next decade of software gets decided in the next two years.
Outcomes band	One line on what engagements end with: outcomes, not tools.
Ticker	Marquee line: nothing ships that we would not use ourselves.
FAQ	Five real objections, answered plainly.
Final CTA	"Tell us what you're trying to build." with the footer below.

Screenshot legend

- **Desktop top:** first screen at 1440px, the hero and what opens the page.
- **Desktop bottom:** the last screen at 1440px, final CTA and footer.
- **Mobile top:** the first screen at 390px. The full mobile page runs tens of screens tall, so the hero screen stands in; the quoted copy covers the rest.
- **Doors:** the middle of the page, scrolled to the three-door section.

TWO LANGUAGES, ONE SITE

Both locales carry the same sections and the same keys; nothing is missing in one and present in the other. The English and Arabic are written independently, so register and sentence length differ on purpose. The door cards are bilingual on the page: title, body, promise and CTA all render in the active language. No eyebrow labels; the title carries the lane.

REVISION 2 (2026-08-05)

The doors were rebuilt after review: per-card and section eyebrows removed (Linear, Vercel and Stripe all open lanes with a title, no kicker), the Tenex hero line replaced with the company identity, and every door line re-sourced from live references. The em-dash and emoji sweep is applied across both languages.

02 The landing · English

One page, one job: turn a stranger into a lead. The hero states the thesis in two lines, then the doors take over.

Desktop top. Hero: "We build our own software." / "And yours, properly." Tagline "We're a product company in Riyadh." Subtitle "We actually build the thing, not just the deck about the thing." CTA "Get in touch".

Mobile, hero screen. Same sections, single column.

Desktop bottom. Final CTA "Tell us what you're trying to build." and the footer.

نفس الصفحة بالعربية: الفكرة نفسها، من المقدمة إلى الطلب الأخير، بنفس الأقسام الثمانية. الكلام مكتوب أصليًا بالعربية، مو مترجم حرفيًا.

"الشاشة الأولى. المقدمة: "نبي تطبيقاتنا الخاصة." / "ومنتجك، كما يجب." وسطر "احنا شركة منتجات في الرياض." وزر "تواصل معنا

الجوال، أول شاشة. نفس الأقسام بعمود واحد، والاتجاه من اليمين لليسار

آخر الشاشة. الدعوة الأخيرة "قل لنا وش تبي." والتذييل

04 The three doors · English

The three-door card pattern: title, body, a promise line, and a distinct verb CTA per door. No eyebrow labels; the title carries the lane, and the doors are the three business lines made clickable.

The doors, English. Heading "Pick the door that matches you", no eyebrow. Each card carries its own promise and CTA.

DOOR	COPY ON THE CARD
Build	Your product, built. A senior squad builds inside your team, proving value in weeks, not quarters. Promise: "Every engagement ends with something running in production, not a slide deck." CTA: "Start a build".
Ventures	Our own products. Arabic first, real data, and the details most products skip. Promise: "We publish what we build, and keep going with whatever people actually use." CTA: "See what we ship".
Think	Knowledge and community. Articles, field notes, and a newsletter for people building here. Promise: "The same thinking that goes into the work, published." CTA: "Read the latest".

الأبواب الثلاثة بالعربية. النمط نفسه: عنوان رئيسي، شرح، وعد، وزر. بدون عناوين صغيرة فوق البطاقات؛ العنوان الرئيسي يحمل معنى الباب. كل بطاقة تقفل بوعده قابل للتحقق، مو بكلام عام.

فكر	معرفة ومجتمع. مقالات، ملاحظات ميدانية، ونشرة لناس تبني هنا. الوعد: "نفس التفكير اللي يدخل في الشغل، ننشره." الزر: "اقرأ الجديد".

06 Below the fold

After the doors, the page makes the why-now argument, states the delivery standard, and answers the objections a buyer will actually raise.

English, last screen. FAQ, final CTA and footer.

العربية، آخر شاشة، الأسئلة، الدعوة الأخيرة، والتذييل.

BLOCK	ENGLISH	العربية
Manifesto heading	"The next decade of software gets decided in the next two years."	"عصر المنتجات الرقمية يتحدد خلال السنتين الجاية."
Manifesto, opening line	"The cost of building good software is collapsing. That doesn't help you on its own. It means the gap between the companies that move and the ones that plan is about to get permanent."	"تكلفة بناء المنتجات الجيدة جالسة تنهار. ووجودك في السوق ما عاد يكفي. والفجوة بين الشركات اللي تتحرك والشركات اللي تخطط على وشك تصير دائمة."
Outcomes band	"We deliver outcomes, not just tools."	"نوصل نتيجة فعلية، مو مجرد أدوات."
Ticker	"Nothing ships that we wouldn't use ourselves"	"لا نطلق ما لا نستخدمه نحن"
Final CTA	"Tell us what you're trying to build."	"قل لنا وش تبني."

07 The objections, answered

Five questions, each one an objection a serious buyer raises before committing. The FAQ trust block is the same pattern tenex.co uses: answer the objection on the page, in the buyer's language.

English

How is Muse different from a typical dev shop?
"We're a small, senior team, not a rotating cast of contractors. No 100-slide strategy decks with nothing behind them. We scope fast, build with you, and measure ourselves on what actually shipped."
What does AI integration actually mean?
"Finding where AI removes real friction in how your business runs, building the systems that do it reliably, and getting your team actually using them. Then repeating that cycle as the tools improve."
How does pricing work?
"Every engagement is scoped and priced on its own, once we understand what you're actually trying to do. Tell us the problem and we'll come back with a number and exactly what sits inside it."
Who do you typically work with?
"Teams that want to move fast without dropping the quality bar. That runs from a founder shipping a first product to an enterprise team trying to get an AI initiative out of pilot purgatory."

العربية

وش يفرقكم عن شركات التطوير الثانية؟
"احنا فريق صغير من أصحاب الخبرة، مو مجموعة متعاقدين جايين عن طريق وسيط، ما راح نسوي لك عرض استراتيجي من 100 شريحة ما أحد يفهمه. بنجلس معك، ونفهم منك، ثم نحدد النطاق ونبني معك. هدفنا مو التسليم، هدفنا نبني منتجات نفخر فيها، جودتها عالية وتخدم احتياجك فعلاً."
ما معنى التحول بالذكاء الاصطناعي عملياً؟
"الهدف مو أن كل موظفينك يستخدمون الذكاء الاصطناعي. الهدف أننا نفهم وين المكان اللي نقدر نوّظفه فيه عشان يقدم فائدة فعلية قابلة للقياس، تحدث أثرًا في طريقة عمل شركتك."
كيف يعمل التسعير؟
"كل مشروع يُحدّد نطاقه ويُسرّع على حدة، بعد ما نفهم وش تحاول تسوي بالضبط. خبزنا بالمشكلة، ونرجع لك برقم يوضح وش يشمل."
مع من تعملون بالعادة؟
"فرق تريد التحرك بسرعة من غير ما تتنازل عن الجودة. من مؤسس يطلق منتج الأول إلى مؤسسات وشركات كبيرة تحاول إخراج مبادرات ذكاء اصطناعي ومنتجات من مراحل تجريبية ونماذج أولية مالها نهاية."

08 Structure and sourcing

Every pattern on the page comes from a shipped example, adapted to Muse. Nothing here was invented from scratch; the copy is quoted or adapted from the sources below.

PATTERN	SOURCE	HOW IT IS ADAPTED
Three-door card layout	tenex.co / linear.app	Title, body, promise, distinct verb CTA per door. No eyebrow labels (per Linear, Vercel, Stripe: titles carry the lanes). The three doors are Muse's own business lines: Build, Ventures, Think.
FAQ trust section	tenex.co	Five real objections answered on the page, in both languages.
Doors as homepage entry points	salla.com	Salla's journey framing (pick the path that fits) becomes pick-the-door; the deep service pages stay on /explore.
Hero identity line	Deck Copy one-liner / Basecamp register	Two-line structure from the company one-liner ("We build our own software, and we help other businesses build theirs properly"): "We build our own software. And yours, properly."
Manifesto urgency	tenex.co	The why-now argument stated as a deadline: the next two years decide the decade.
Outcomes band	mozn.ai	"We deliver outcomes, not just tools." borrowed as-is.
Ticker line	Internal quality bar	"Nothing ships that we wouldn't use ourselves" is the studio's own release rule, stated as a marquee.
Final CTA	Internal positioning	"Tell us what you're trying to build." opens the conversation with the problem, not with the company.

NO INVENTED PROOF

The page makes no claims it cannot support: no fake testimonials, no client logos, no fabricated metrics. The enterprise experience signal lives on the About page, not here.

09 Open decisions

Four decisions remain. Each carries a recommendation; a different answer from the team changes the plan.

1. Doors as navigation, or doors as sections?

The three doors sit mid-page and link onward. They could also become the primary navigation, with /explore retired. Recommendation: keep the doors as homepage sections and keep /explore as the deep-dive; a buyer who wants one door gets the full page, a buyer who wants all three gets the summary.

2. The Think door, before the content exists

The Think door promises articles, tutorials and a newsletter. The newsletter signup is live; the articles are not published yet. Recommendation: ship the door with the newsletter linked, and hold the articles until the first two are written. A door that links to nothing erodes trust faster than a door that is missing.

3. The Arabic register

The doors copy is deliberately colloquial ("نشغل بها", "شوف اللي نطلقه") while the legal and about pages stay formal. Recommendation: confirm the split with a native copy review before /ar ships; colloquial for hero, doors and FAQ, formal for legal and careers.

4. Unused service entries in the message files

The content files carry three service entries under the doors section (product-engineering, ai-integration, brand-interface) that no page renders. Recommendation: remove them before merge so the content files match what the site actually shows.
